Quota Trojan

From: jordy () newport thirdwave net (Jordy)

Date: Wed, 24 Jul 1996 02:04:23 -0500

I thought i'd respond to the little quota trojan that has been cycling around. Yes, this program will mail user on thirdwave named 'tsk' [who doesn't exist], a whole bunch of nasty files [/etc/passwd, NIS database files, etc], and set your .rhosts file so anyone could log in. The little program was reported to CERT roughly 4 months ago and an effort was made to notify all administrators of the immediatly affected sites to tell their users not to run it.

I'm sure if you try hard enough, you could get CERT to release the information on it. I did authorize for anything they wish to release to be released, but so far, they have declined the right.

Jordy
